

Work SMARTER not harder & achieve more

Managing the Performance & Productivity of Remote Teams

Suitable for any anybody that leads & manages a remote working team

Virtual Classroom

75 Minute Session

More and more we are being asked this question. Let's consider a few facts. We went into 'lockdown' on the 23rd March and now many people feel settled into their new working environment. Routines are in place, work spaces organised, technology up & running.

However, when will life get back to normal? We are unsure. But something we can be sure of is "the widening gap". If your people are not being productive, with each week that passes, you will be losing ground, falling further behind your plan, becoming less likely to hit your targets and achieve your goals.

Is now the time to address the "widening gap" between where you are and where you want to be?

During this virtual classroom event we will answer this and the following important questions:

- Why should I discuss productivity & performance?
- When should I raise the subject?
- How do I do this in a thoughtful & constructive way?
- What aspects of productivity & performance should I concentrate on?

By the end of this session you will also understand the 11 barriers which most commonly stop people from being more productive when working remotely. Plus you will have a range of ideas which you can easily implement to start this important conversation with your team. Our aim is to give you the confidence to get the most out of this delicate and difficult situation
