

# CIC Health & Safety Certification

---

Delivered with Accredex

## Professional Route for Site Competence including:

- Engineers
- Architects
- Surveyors
- Consultants
- Project Managers

## Enables

- CSCS White card (AQP/PQP)
- SKILLcard (AQP/PQP)
- CSCS Red Trainee Card

## Context & Drivers

# Why **Professional** Certification Matters

### Context

- Construction sites today include many **professional roles**
- But most certification routes were originally designed for **trades**

The CIC course addresses that gap

### 3 Key Drivers

- **Building Safety Act**  
Renewed focus on individual competence
- **Scrutiny of Access**  
Tighter control of site entry requirements
- **Role-Relevant Training**  
Need for specific role-relevant education

**Competence**  
Protect the person

**Safety**  
Protect the site

**Protection**  
Protect the Business

Flexible & Accessible

## Simple **Online** Delivery

### Learning Content

- 6 hours of comprehensive learning content
- Accessible online from **any device**
- 30 day flexible learning window
- **Teach Me / Test me** sections in each module
- No classroom or test centre attendance or travel required

### Exam Process

- **Internal Invigilator Process**  
Exam conditions required
- **Fully CSCS Compliant**  
No test centre required
- **Two Exam attempts included**  
Additional fee for further resits

### Certification Process

### Health and safety at work

## Defining duty holders

CDM is a team effort where everyone works together to create a safer project. Health and safety duties are divided between five duty holders under CDM (*there are additional Duty Holders referenced in the Building Safety Act 2022; you can find more information about these in a dedicated section within this module*). Each duty holder has clearly defined roles and responsibilities that help ensure construction work is carried out safely.

### The five duty holders under CDM 2015:

- + Client
- + Principal Designer
- + Principal Contractor
- + Contractors
- + Designers

### Did you know?

It is the client's duty to notify The Health and Safety Executive (HSE) of any construction project that:

- last longer than 30 working days and have more than 20 workers working simultaneously at any point in the project; or
- exceed 500 person days

This is done by submitting an F10 notification form to the HSE, as soon as practicable, before the construction phase begins. If after initial sign-off the client then makes significant changes, the F10 notification should be updated.

The F10 form also needs to be displayed on site.

## Up to date content

# Course Content Summary

### Course Summary

1. Legal Requirements on site
2. Your Health and Welfare
3. Your safety on site
4. Risk Management Issues
5. Design Risk Management
6. Protecting the environment

### With input from

Produced with industry experts including Faye Burnett, Amy Skyes, Andrew Ramsey, Clive Johnson, Dan Cooke, Greg Ward, Liz Drummond, Louise Clark, Niall Rowan, Nick Groom, Paul Bussey, Philip Baker, Samantha Mepham and Tony Burton.

Includes updates covering the 2022 Building Safety Act

## Operational Benefits

### For HR, L&D & H&S teams

- Internally managed exam
- Standardised Certification Pathway
- Reduced Administration
- Clear Auditable evidence of **Competence**
- **5 hours of CPD**
- **Managed Service options** - from just adding users to weekly reporting, or end to end communication & CSCS card application management

### For Project Teams

- **Less time away from work**  
No travel to test centres
- **Relevant Professional Content**  
Specific, updated content for professionals
- **Flexible Scheduling**  
Study and exam around work project commitments

Return on Investment - for 1000 users savings are over £100,000 using our course vs other

Time  
Saved

Lower  
Cost

Compliance

## Cost and Industry Adoption

### Standard Rate

**£49.99 + VAT / User**

#### What's included:

- Course access for 30 days
- 2 Exam attempts
- 5 Year accreditation
- Instant digital certificate
- Enables CSCS / SKILLcard application

**Volume Discounts Available**  
Contact us for Enterprise Pricing

### Trusted by organisations including

**Cost Efficiency**  
High Value, Low overhead

**Scalable Rollout**  
From 1 to 1000+ users

**Enterprise Use**  
Managed service and reporting

## Questions and Next Steps

# Thank you for attending

We are ready to help you implement the CIC Accredex Certification route for your professional teams. Here's how we move forward

**1** **Course Demonstration**  
See the platform in action

**2** **Q&A Session**  
Address specific customer requirements

**3** **Implementation Discussion**  
How we onboard you as a customer
